

ACTIV 10G Ethernet EMI Filter

The ACTIV 10G is the most advanced EMI filter available for Ethernet connections, providing complete electromagnetic isolation for signals ranging from 10 Mbps to 10 Gbps without impacting network performance. Proprietary DSP (Digital Signal Processing) techniques faithfully reproduce Ethernet signals while rejecting interference from 10kHz to 40GHz at better than 100dB. Designed for both commercial and military-grade environments, the ACTIV 10G ensures uncompromising EMI suppression, long service life, and rugged reliability.

Proprietary DSP Technology for Ultimate Filtering

- Faithfully reproduces Ethernet signals without introducing latency or distortion.
- Maintains signal integrity for fast rise-time digital square waves.
- Invisible to network negotiation and operation.

Built Tough for Demanding Applications

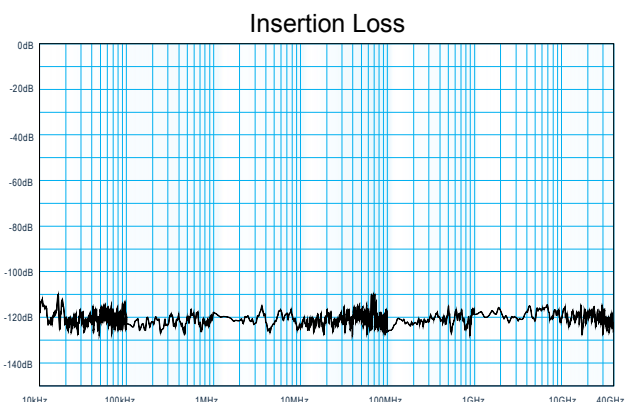

- Machined from solid aluminum for superior mechanical integrity and EMI shielding.
- Robust protection circuitry includes ESD and transient voltage suppressors, gas discharge tubes, and current limiters.
- Suitable for harsh military environments as well as climate-controlled installations.

Universal Mounting System

- Mounts easily and securely on RF shielded enclosures with any wall thickness. Requires a simple, circular mounting hole for use with multiple standard penetration lengths (e.g., short, medium, long) to accommodate different wall types.
- Field-changeable penetrations allow for easy on-the-spot reconfiguration.

Suitable for ICD 705

- Engineered to meet the physical and technical security controls outlined in Intelligence Community Directive (ICD) 705, DoD and EMSEC Standards.
- Offers a trusted alternative to fiber optic penetrations for SCIF, SAPF, and TEMPEST applications.

Technical Specifications

Filter Performance	Shielding Effectiveness	>100dB from 10kHz to 40GHz (typical)
	Insertion Loss	>100dB from 50Hz to 40GHz (typical)
	Radiated and Conducted Emissions	Exceeds MIL-STD-461 CE102 Exceeds MIL-STD-461 RE102 Exceeds FCC Part 15 A, B Exceeds EN 55032 Class A, B
Network Performance	Auto MDI/MDI-X	Automatically detects and configures MDI or MDI-X.
	Auto Negotiation	Input and output automatically configure 10Mbps, 100Mbps, 1Gbps, 2.5Gbps, 5Gbps or 10Gbps
	Hot Pluggable	Can be plugged in/out without affecting filter or other links.
	Auto Link Restoration	Automatically re-establishes network link after a link loss.
